MEMORANDUM

TO: Jeff Zelikson, Director  
Division of Water Resources

FROM: Beatrice S. Tylutki, Director  
Solid Waste Administration

SUBJ: National Gypsum Company, Millington, New Jersey

Enclosed are preliminary plans submitted to this Administration concerning improvements proposed by the subject company to protect the Passaic River from a terminated asbestos disposal site. These plans are currently being reviewed by us. This site, and the problem of asbestos being found in the Passaic River, has recently received a lot of press coverage. Therefore, I would appreciate you expediting a review of the plans by the Bureau of Flood Plain Management to determine, as soon as possible, if a stream encroachment permit is required for this project.

The company is already aware that an NPDES permit will have to be applied for and will do so as soon as we approve their plans. If any further information is needed concerning this matter, please contact Mr. Frank Coolick of my staff at 2-0242.
